

TSN College provides training facilities for the Indian Triathlon Academy

TSN College, Chennai: TSN College provides training facilities for the Indian Triathlon Academy by way of a cycle track at the college premises. The cycle track which is 450 metres long and 4 metres wide provides Triathletes at the academy a safe training environment for the development of cycling speed and skills rather than battling Chennai's busy traffic.

The academy believes that the cycle track facility will significantly enhance the development of Triathlon in India and provide the much needed opportunity to India's Triathletes to train at a higher and more consistent level. Other facilities at the College in addition to the cycling track will include a 6 lane 400 metre running track with a football field in the middle. Both of these facilities are still under construction.
